

2019 Rod/Line Recommendations

Grain weights are calculated by the amount of line beyond the rod tip while maintaining an anchor. Recommendations are for two-hand spey casting. If lining up for overhead casts, the recommendation is to use 60 grains less than the listed size. Your casting stroke may favor a different-weighted line than we recommend. This is just a starting point.

Model	Length	WT	Gr. Window	Skagit FIST	Skagit Compact	Skagit Scout	Rage Compact	Scandi Long	Switch Streamer	Switch Float
Full Spey 6130	13'0"	6	390-480	450	450	420	420			WF6
